

BATTMASTERTM

Powering an **ECO** Friendly Future

Electric Vehicle | Solar Pump | E Cycle | E V Retrofitment
Battery Rejuvenator & Maintenance

- ✔ Prolongs lifespan of used batteries
- ✔ Professional battery desulphator
- ✔ Built - in Charger & desulphator*
- ✔ Time tested technology

Reasons of Battery Failure

- Poor Maintenance
- Sulphation
- Incorrect Charging
- Aging
- Excess Heat
- Physical Damage

BATTERY REJUVENATOR & MAINTENANCE

Batteries are used in many fields like automobiles, UPS systems, engines, industrial and agricultural equipments, Railways, Telecom, Defence etc. The life of the battery is important in all these sectors, which depends on charge and discharge cycles. Improper charging, overcharging, storage in discharged state cause damage to the battery creating sulphation on plates. The tired battery needs immediate replacement, which may cost heavily & is also unexpected.

The sulphation process reduces charge absorption of plates and decreases its storage capacity.

A conventional charger cannot eliminate sulphate crystals from the plates.

BattMaster rejuvenator charger produces miraculous effect on tired battery in one charging cycle.

The best charging technique supported by NASA' is a pulse charging.

In BattMaster, a high current pulse is pumped into plates followed by appropriate discharge and rest period.

High current BattMaster reacts with the chemicals & produce gasing. Discharge action eliminates gas bubbles from plate surface and the plates are fresh to absorb next charge pulse. This results in sulphate crystals dissolve into acid and the battery capacity is regained.

The intelligent BattMaster controls charging as per the battery status and heating. It automatically stops the charging when the battery is charged, avoiding overcharging.

WHY BATTMASTER :

- State of the Art IGBT based intelligent design.
- No overcharging , resumes action when power cuts and resumes.
- Rugged, elegant and reliable product with future upgradability.

Available Market Potential for Battery REJUVENATE Business

- | | | |
|--------------------------------|---|-----------------------------|
| • DCC Bank branches | • Coaching classes | • Battery operated vehicles |
| • Credit Pathsanstha branches | • Mobile Towers | • Apartment Lift backup |
| • Co-op Banks branches | • Shops in Shopping Malls | • Train monitoring system |
| • National bank branches | • BSNL Offices | • gr Laboratories |
| • Private Banks | • MSEB offices | • N. Wind Power |
| • Insurance Companies branches | • ZP/ Panchayat allied offices | • Train 2 v Battery |
| • Hospitals | • Educational Institutes | • Military Use Battery |
| • Finance Companies | • Solar systems/ Street lights | • Mobile Tower |
| • Hotels with battery backup | • Corporate offices | • Shipping Industry |
| • Commercial shops | • All kind of mfg units | |
| • Household Inverters | • All Kinds of battery operating vehicles | |
